Bachelor of science computer science(BSc Cs)	65%
Master of computer application(MCA)	67%(upto 2 <sup>nd</sup> sem)

### **Academic Project Undertaken**

**Project Name:** E-Dietician

**Duration:** 3 months

**Environment:** .NET and SQL Server

**Project description:** The online artificial dietician is an artificial intelligence about human diets. It acts as a diet consultant similar to a real dietician. Dieticians are educated with nutrient value of foods. A dietician consults a person based on his schedule, body type, height and weight. The system too asks all this data from the user and processes it. It asks about his height, weight etc. The system stores and processes this data and then calculates the nutrient value needed to fill up users needs. The system then shows an appropriate diet to the users and asks if user is ok with it, else it shows other alternate diets to fill up users needs.
