Graduation Project

Title	VIDEO SURVEILLANCE USING MOVING OBJECT REGONITION TECHNOLOGY.
Location	CSI college of Engineering, Tamilnadu
Duration	6 months
Description	<p>Objective of our project is to enhance the Security. For this we have used Video Surveillance Technique. Thus enabling the user to be free from forgery in the banks, shopping malls and highly security needed places. We need a webcam and Mobile phone with GPRS Facility. The first step is taking pictures in a MIDlet is obtaining a player from the manager. The player needs to be realized to obtain the resources that are needed to take pictures. The technique involved in comparing the frames is by comparing two images simultaneously. When the webcam will automatically notify the user through SMS with the help of WAY2SMS.COM. Using the GPRS connection the image can be seen in the phone itself. The SMS is like "MOTION DETECTED" and the link also. At the sametime the image will be uploaded in the site Imagemagic.com. It will give the all changed images with time and date. We can check at what time the incident is happened and the image also.</p>
