Job Description

Registered Nurse comprises the largest group of health care workers. A Nurse must learn what it takes to work directly with patients and their families. They are the primary point of contact between the patient and the world of health care both at the bedside and in outpatient setting. Nurse performs frequent patient evaluations, including monitoring and tracking vital signs,

performing procedures such as IV placements, phlebotomy and administering medications. Nursing offers a wide range of carrier opportunities working with various populations, from neonatal care to gerontology.
