Complete management of all sorts of Internal Medicine Cases .Expertise in the management of all Complicated cases as well.

Can manage any sort of noninvasive Cardiology case Acute emergency to thrombolysise block management respiratory embarrassment anagement Hypotension or Hypertension management etc

Can deal Neurological Cases with Cerebral infarct as a part of specialised Internal Medicine cases .Can manage semi conscious and unconscious cases

Caninterpret CT scan emergency

Can do Ultrasound abdomen and also any system for that matter as I have passed Ultrasound Diploma

Can manage minor procedures

Projects

EchoCardiogram Changes in Myocardial Infarction

On evaluation of the Myocardial Infarction patients the regional wall motion abnormality is temporary most often and the majority of immediate Angioplasty and Bypass Surgery CABG are most often unwanted which could have been managed by good diet exercise and optimal medication and change of life style

The Study of Cholesterol level in Infarction patients

It is imperative to know that Cholesterol is not the culprit it had long taught for decades. On the contrary it is understood that it is the intimal roughness of the coronary artery thereby increasing the viability for the increase likelihood of fat deposition causing stenosis of the lumen of the so called Coronary arteries

The Protein Adiponectin and the Diabetes mellitus and chance of increase in abdominal girth due to free fatty acid deposition

On evaluation of the level of adiponectin a protein molecule in Diabetes and or obese individuals, it is understood that the greater the Adiponectin level in the blood the lesser the chance of Free fat deposit so also Diabetes mellitus thereby reducing the CAD

The level of Magnesium in the CSF of Tuberculous Meningitis patients

In the study of the magnesium level in the CSF of TBM patients it is understood that the level is around 1mg .40 such patients have been studied by me in the Medical College

Ace inhibitors versus ARBS in the management of Hypertension

It is proven beyond doubt that ARBS is a better option to manage Hypertension particularly so due to the increased prevalence of Respiratory distress in our Community

Achievements & Awards

In 2011 Certification of Commendation Award from Thomas Jefferson University Philadelphia USA

Passed Psc exam Kerala in 1994

Passed GP License Exam of DOH in 1990s

Received MOH Qatar License in 2009

Worked as Asst professor in SNIMS Medical College Chalakka Manjali Cochin
