Job Objective:

Dedicated and compassionate nursing professional with strong background in critical care. To obtain the position of ER Nurse in a healthcare oriented multispecialty hospital where I can deploy my extensive experience to provide quality service to traumatized patients.

Summary of Skills:

- Experience of assessing and stabilizing patients in emergency room
- Skilled in coordinating with physicians and support staff
- Ability to handle emergency room equipment, measure cardiac outputs, and do calculations
- Proficient in maintaining proper charts of special intake and output to follow diet restrictions for critical care patients
- Ability to take patients' detailed information and document patients' charts
- Assist physicians, surgeons in various treatments like removal of foreign body particle, wound care, and fracture cases
- Strong critical thinking skills to provide immediate medical care under pressure situations
- Ability to communicate effectively with patients, family, physicians and nursing staff

Work Experience:

STAFF NURSE

CHIKITSA MULTISPECIALTY HOSPITAL, SAKET NEW DELHI

April 2009 to July 2012

- Assessing and stabilizing patients in emergency room, and helping doctors in treatment
- Demonstrating awareness to take immediate actions in the emergency room for patients showing less response to medication and altering treatment plan to
- give timely IV injection after consulting the concerned specialist
- Collaborating with the ambulance team and reaching accident spots, or places of terrorist attack as soon as possible, and administering timely medications to victims
- Coordinating with cardiac surgeons for procedures that extended for 5+ hours, and monitoring patient responses during the operation
- Providing training to nursing interns in the ER room, and maintaining chart records for 10 + patients daily in night shift if required
- Assisting doctors to assess complex cases dealing with major burn and appearance damage

STAFF NURSE

BHAGWATI HOSPITAL MEHROLI DELHI

October 2012 – APRIL 2013

- Assisted doctors to perform lifesaving treatments by arranging equipment for advanced cardiac surgery, renal surgery, and neonatal resuscitation
- Assisted surgeons in various surgical procedures for treating patients of acid attack, bomb, firing and natural calamity
- Treated wounds, controlled infection, and administered IVs to patients
- Monitored patient progress and gave post-operative care to patients whose limbs had been amputated due to gangrene
- Coordinated with a 10 member emergency specialist team to transport patients with acute illness developed after facing traumatic scenes
- Collected and interpreted diverse clinical signs such as vital parameters, lab results, and effect of medication on internal wounds
- Participated in reviews of emergency department to improve ER records for providing better healthcare

EMERGENCY WARD NURSE

PUSHPAWATI SINGHIA RESERCH INSTITUTE SHEIKH SARAI NEW DELHI

APRIL 2013 – TO OCT 2018

- Monitored vital signs of all emergency room patients and reported uncommon responses to the supervisor
- Coordinated with physicians to understand any relative tests to be conducted on newly admitted patients and collected samples for the lab
- Collaborated with the nursing department to setup special activity rooms for patients to help them in fast recovery post trauma
- Attended to 20 + kids in the childcare department, ensured their needs are met and set up activities for them to provide a change in the environment
- Shared medical reports with the concerned physicians to develop treatment plans
- Assisted in maintenance, and sterilization of medical instruments used in the diagnostic of diseases
- Understood patient complaints by noting down symptoms and prepared case papers
