- Sharing information, suggestions, and observations with project leadership to create consistency in safety standards throughout the production team and the entire company
- Meeting company health and safety goals
- Investigating causes of accidents and other unsafe conditions on the job site
- Liaising with law enforcement and other investigators who are present at the time of a serious accident
- Finding the best way to prevent future accidents
- Reviewing and reporting on the staff's compliance with health and safety rules and recommending commendations or dismissal based on performance

PROJECTS

Project Name: MATERIAL HANDLING

Role: SAFETY OFFICER

Team Size: 4

Project Duration: 1 Month

Project Detail

When designing a material handling system, it is important to refer to best practices to ensure that all the equipment and processes—including manual, semi-automated and automated—in a facility work together as a unified, By analyzing the goals of the material handling process and aligning them to guidelines, such as the a properly designed system will improve customer service, reduce inventory, shorten delivery time, and lower overall handling costs in manufacturing, distribution and transportation
