DISSERTATION

Dissertation on “**EVALUATION OF THE PATTERN OF LUMBAR INTERVERTEBRAL DISC PROLAPSE BY MAGNETIC RESONANCE IMAGING AND ITS CLINICAL CORRELATION**” which has been accepted by KERALA UNIVERSITY OF HEALTH SCIENCES.

INTERESTS

I have had the privilege to obtain my postgraduate radiology training from a high volume institution with extreme academic focus. During my residency, I have had good exposure with variety of radiological modalities including plain radiography, special radiographic studies, mammography, ultrasound and doppler studies, CT and MRI scans. I have also received training in managing the emergency radiology section and have got the opportunity to observe and diagnose a good number of cases from various specialty and super-specialty branches. I have special interests in abdominal radiology, neuroradiology and cross sectional imaging. I have been actively involved in undergraduate teaching and well oriented in post graduate teaching programs during my residency.

ABOUT MYSELF

I am passionate about my profession and my specialty. I have a strong work ethic. I am hard working and detail-oriented. I am a fast learner and a resourceful team player with good communication skills. I hope to make good use of the training I have received, for the benefit of humanity.
