OBJECTIVE

To impart creativity and strive for the best in the field and seeking a challenging position as a professional where my skills are utilized for the growth of organization and which is career oriented.

PROJECT DETAILS

1. Mini Project Name : E Waste Management
(<https://www.ncbi.nlm.nih.gov/pmc/>)

The improvement of the urban waste collection service and in general, the achievement of a more efficient management of the waste, is one of the main challenges that the cities face, especially due to population growth. Thus, smart waste management is a key factor of smart cities. Within this scenario that pursues efficiency, according to the objective of sustainability of work set out by Horizon 2020, the EU's research and innovation framework program, whose report are considered key to the development of a smart city for community growth, focus on pillars of municipal management, citing among them collection and management of waste.

Objective: - Complete automation to control overall processes in the electronic gadgets. The software program 'E-Waste Management' provides an eco-friendly environment, repairment of electronic items, finding new equipment in the failure electronic substances and different type of enquiry which needs an instant and quick situation. It contains 4 modules. If there is any problem related to the electronic equipment the consumer can put it in our site and we will repair it and sell it .

2. Main Project Name : Pandemic Disease
(<https://openwho.org/courses/pandemic-epidemic-diseases>)

A pandemic is an epidemic of an infectious disease that has spread across a large region, for instance multiple continents or worldwide, affecting a substantial number of people. It is an outbreak of global proportions. Recently, the best example is Covid19, CoronaVirus. Pandemics are large-scale outbreaks of infectious disease that can greatly increase morbidity and mortality over a wide geographic area

Objective: - Complete automation to control overall processes in the pandemic crisis or disease. This project helps mainly government. In this pandemic era, it is very useful. If there any urgent emergency case we can a lot them to the best hospital, if there any needs wants to the quarantine centers that we our site will provide them, any bed vacancies our site will provide.
