Research Activity

- Completed a research study to assess the gadget dependency among undergraduate students of Udupi district.
The research was conducted as a social experiment by using primary data collection methods. The data collection was conducted in two stages. Pilot study was conducted among random students of the Second Year BBA batch students of Udupi group of institutions.
The second stage of sampling was conducted among all students of BBA batch of Udupi group of institutions.
This study was conducted using a questionnaire focusing on gadget dependency. The period of research was 3 months, after that study the research came to a conclusion that about 72% of young undergraduates are highly dependent on gadgets like smartphones.
