Objective

Recent university graduate with Masters in Psychology specialized in Clinical Psychology. Committed to serving the community, by providing patients with empathetic understanding, congruence and unconditional positive regard. Looking for an entry-level position in the psychology field, bringing exceptional communication skills and strong observational skills to research and analyze patients effectively to provide an accurate diagnosis.

Skills

- Empathy and a person-centered approach to clients.
- The ability to recognize your own limitations and respond to difficult situations.
- The ability to apply your knowledge of academic psychology and research to clinical problems.
- The capacity to be critical and analytical and to work in a self-motivated, independent way.
- Excellent communication and interpersonal skills in order to deal with people in distress.
- Able to work in a team as a team player and at times a leader.
- The ability to collaborate with colleagues from other disciplines.
- The determination to succeed.
- The ability to use psychometric and Neuro-psychological assessments for client welfare.
