Internship

I got the opportunity to done my 6th year internship at Ganga hospital. I can able to do somany audits like Inpatient, outpatient audit, Turn around time(TAT) audit, surgical prophylaxis audit, paracetamol over dose audit, medication reconciliation audit, emergency and non emergency drug audit and also I join with Doctor's in their rounds like geriatrics, diabetology,gynecology, and ICU department.I done a mini project under Dr. Balavenkat on "post operative pain assessment in spine surgery" and also I participated in pharmacy duties like dispensing drugs, auditing, and packing drugs.

Erode cancer centre, Erode, Tamilnadu.

1/08/2022 - Present

Internship

I am doing my last 6 month internship at Erode cancer centre. The nursing staffs of ECC include us in all chemotherapy dilutions and also we put IV to the cancer patient.we also participated in the ward rounds and dispense medicines in pharmacy.

PROJECTS

STUDY ON PREVALENCE AND INCIDENCE OF DRUG-DRUG INTERACTION IN CANCER PATIENTS WITH CHEMOTHERAPY AND ITS INTERPRETATION IN A TERTIARY CARE HOSPITAL.

The study was conducted by identifying Drug-Drug interation among cancer patients through lexicomp application and categorize, assess the drug interaction based on their mechanism and severity,

the adverse outcome and frequency are monitored. By examine the drug interaction

it can avoid the adverse effects, minimize the disease complication, reduce the cost of health care services and also can able to improve the quality life of patients.

PUBLICATIONS

Case report on QTc-Prolongation by interaction of Domperidone and Granisetron.

A 48 year old female patient with a case of recurrent carcinoma of left breast with lung metastasis.patient was administered with Domperidone and Granisetron together they will enhance the QTc-Prolongation. No action is required for majority of patients. Increased ECG monitoring may be considered to the in patients at high risk for QT interval prolongation such as older age, female sex, bradycardia, hypokalemia,heart disease and higher drug concentration. Combination medications that lengthen the QTc interval may rise the risk of major side effects and the risk varies depending on the amount of drug used.
