I seek challenging opportunities where I can fully use my skills for the success of the organization.

Job responsibilities:

- 1.Taking handover from staff for different cathlab procedures
- 2.Prepare the patient for all types of cardiac as well as peripheral catheterization procedures.
- 3.Assist the doctors for procedures posted in cathlab which includes following:
 - a)Coronary angiogram
 - b)Percutaneous coronary intervention
 - c)Congenital device correction procedures like ASD, VSD, PFO, PDA, etc. .
 - d)Valvular plasty like PTMC, BAV,BPV,etc.
 - e)Pacemakers and complex pacing and fibrillation device implantation.
 - f)Peripheral angiograms and interventions
 - g)Coiling, empolization with particles and glues.
- 4.Maintaining register for procedures, daily checklist, infection control ,etc.
- 5.Performed 2D echo, TMT, TEE holter monitoring etc under the supervision of cardiac physicians.
- 6.Provides excellent patient care and service necessary for echocardiographic procedure and cathlab procedure.
- 7.Assisted cardiologist and senior technician in transesophageal echocardiogram,TMT,holter etc....
- 8.Maintain cleanliness of equipment before and after each procedure.
- 9.Process each procedure with information system requirements and maintain accurate records of all echocardiographic procedure.
