PROJECTS

TILEMATE- THE BLUETOOTH TRACKER

Timemate is an American electronic Consumer company which produces key finder which uses bluetooth 4.0. It allows the users to locate product using bluetooth on the information available such as the location of the product where it was last seen.

ANDROID CONTROLLED SMART WHEELCHAIR WITH VOICE AND GESTURE CONTROL

The Wheelchair is topmost used assistive devices for enhancing the personal mobility of disabled people. Our project will focus to operate the Wheelchair that works on the inputs such as voice, touch and gesture via an android phone and navigates according to the commands provided. It is very help to elders and physically challenged people to move the Wheelchair without external aid. This project uses Arduino kit Microcontroller circuit and DC motors to create the movement of the Wheelchair and Ultrasonic Sensors to detect the hurdles in between wheelchair.
