STRENGTHS

💎 Flexibility

Our day-to-day work changes frequently. While nurses will have hospital routines throughout their day, they could be called in for an emergency.

💎 Communication skills

We are work with patients, doctors and other healthcare staff. We need to communicate with these people so that whoever we speak to understands the current situation. With patients, we often need to explain diagnoses or test results and then go over treatment plans. The ability to communicate effectively with various people throughout the day is a crucial strength for nurses to have.

💎 Problem solving skills

Ability to identify critical issues & create identity solutions

💎 Empathy

We need empathy when interacting with patients. A patient and their family who are in a stressful or difficult situation may have to manage psychological or physical issues. Having empathy to interact with the patient and their family and helping them to cope with problems is very important in our nursing profession. Having the ability to understand and share those feelings with the patient and their loved ones is an essential strength for a nurse.

CERTIFICATION
