RESPONSIBILITY

- Managing the appointments with a daily intake of 30-70 patients for CT, 20-40 cases for MRI, and x-ray imaging of more than 120 patients.
- Cross-check the patient's identity (date of birth, full name, age & UHID).
- Identifying patients on arrival to the radiology department, explaining the examination that they are going to undergo and advising them on the instructions to be followed during the examination and the duration of the examination.
- Empathize and reassure patients who are worried, anxious or reluctant to undergo the procedure by providing thoughtful and constructed responses to their questions.
- Plan and prioritize own and section workload and manage the pressures of accommodating emergency/trauma work in addition to planned sessions. Assess the radiation risk to the patient and ensure it is kept as low as reasonably achievable ALARA principle, and assess any additional risk involved within your modality. Adapt technique accordingly.
- Scan information are kept confidential from patient and bystanders.
