INTERNSHIPS

KARNATAKA INSTITUTE OF MEDICAL SCIENCES
Hubli, Karnataka, India

Dec 2021-22

- Served as a dedicated and supportive Intern in a fast-paced environment with good exposure in Clinical settings.
- Completed departments including General Medicine, Surgery, Pediatrics, Gynaecology and Dermatology which enhanced my talents and additional skills.
- Actively attended wardrounds and achieved to maintain a rapport with healthcare professionals and patients.

PROJECTS

A Study On Drug Prescribing Pattern, Drug Interaction And Evaluation of Medication Adherence Among Smoking And Non-Smoking Chronic Obstructive Pulmonary Disease Patients In Tertiary Care Teaching Hospital

- A Prospective, Observational and Hospital based study was conducted on patients to assess the drug prescribing pattern, drug interactions based on their severity and medication adherence and to determine various etiologies in non-smoker COPD patients for a period of 6 months..
- The study concludes that proportion of nonsmoker COPD patients are higher than smokers due to multiple risk factor in which outdoor air pollution was the most leading factor. The major reasons for medication non-compliance were felt better and stopped, forget to take and refill.
