## WORK EXPERIENCE

- Had 1 year of work experience as General practitioner in private clinic (2019 - 2020)
- During the **three-years of residency** training I have assisted complex surgeries like orthognathic, dentoalveolar, pathologies and temporomandibular joint surgeries.
- Assisted patients surgically to correct jaw deformities, including cleft lip and palate.
- Developed individualized treatment plans for patients requiring dental implants or other prosthetic devices to restore facial symmetry and function.
- Treated facial lacerations, intraoral lacerations and fractured facial bones.
- Performed bone grafts and gum grafts.
