CURRENT JOB PROFILE

As a B.Tech graduate with NEBOSH holder, I am pursuing my career as a Safety Engineering Supervisor with my present employer. My primary duties and responsibility include ensuring the safety and well-being of workers and the environment in the workplace, by creating and maintaining a safe working environment, reducing workplace accidents, and ensuring compliance with safety regulations. Given below is a brief description of my present duties and responsibilities:

Risk assessment: Identify potential hazards and assess risks associated with various work processes and activities and also develop strategies to mitigate these risks and prevent accidents.

Incident Investigation: Investigate accidents, incidents, and near misses at workplace to determine the root causes and recommend corrective actions. Ensure that lessons learned are applied to prevent future occurrences.

Safety Inspections: Conduct regular safety inspections of the workplace, equipment, and machinery. Identify and rectify safety deficiencies and recommend improvements.

Safety Policies: Enforce safety policies, procedures, and guidelines tailored for workplace and keep the relevant documents up to date with changing regulations.

Documentation: Maintain detailed records of safety activities, incident reports, safety training, and safety inspections. These records are essential for compliance and continuous improvement.

Safety Equipment: Ensure that all safety equipment and PPE are available, in good condition, and properly used by employees/workers. This includes helmets, gloves, safety glasses, respirators, etc.

Communication: Fostering the culture of safety by promoting open communication among employees/workers regarding safety concerns and ideas for improvement.

Environmental Protection: Responsible for ensuring that the workplace adheres to environmental regulations and practices that minimize environmental impact.

Continuous Improvement: Continuously monitor and evaluate safety programs and practices to identify areas for improvement. Recommend to implement changes and updates as needed to enhance safety performance.

Safety Audits: Associate with external safety auditors to assess the effectiveness of safety programs and compliance with regulations.
