Projects

- **Project**

TRANSCUTANEOUS ELECTRICAL NERVE STIMULATION

A TENS unit sends electrical pulses through the skin to start your body's own painkillers. It works best when used during activities. It delivers electricity across the intact surface of the skin to activate underlying nerves.

- **Seminar**

NEURAL SYSTEM AND ENGINEERING

Neural engineering involves work of brain.

Neural engineering has generated a lot of excitement not only for the development of interfaces between brain and computers.

Neural systems engineering is trying to understand these neural connections and adapt them to the artificial environment.
