PERSONAL PROJECTS

Automated ration distribution system

- Ration Distribution System means distribution of essential commodities to a large number of people. It is done by the government. Public distribution system is one of the widely controversial officers that involves corruption and illegal smuggling of goods. Our main objective here is to automate the process of the distribution

Augmentative and alternative communication device

- The Project was conducted to a very unique opportunity for product development from NISH (National Institute of Speech and Hearing) for developing an AAC (Augmentative and Alternative Communication) device. AAC encompasses the communication methods used to supplement or replace speech or writing for those with impairments in the production of spoken or written language
