Duties and Responsibilities

Preoperative

- Assess patients in need of surgery for skin color and body temperature
- Review conditions that may affect surgical status such as diabetes and hypertension
- Verify patients' name and other credentials and match them with surgical orders
- Engage in conversation with patients to determine their fears and attempt to put them at ease
- Answer patients' questions and ensure that they have been run through the surgical procedure in theory
- Prepare operating units by ensuring instruments and supplies are clean and available
- Develop an intra-operative nursing care plan based on preoperative assessments

Intra-operative

- Confirm that the intra-operative nursing plan is constantly in sync with prior assessments
- Anticipate surgeon's needs for instruments, sponges and suture tubes and make them available immediately
- Observe patients during surgical procedures and communicate any important observations to the surgical team
- Manage instruments and supplies contaminated during surgery and make sure that they are removed for sanitizing or disposing off
- Assist in placing patients in positions to assure operative access
- Adjust operating tables and equipment to meet the needs of the surgical team

Postoperative

- Assist in applying closing surgical wounds and applying dressings
- Ensure that patients are comfortably placed or moved on mobile beds
- Take postoperative care instructions from the surgical team
- physically transport patients to recovery rooms
- Direct the activities of the cleaning staff by ensuring that all surfaces in the operating room have been cleaned and sterilized effectively
- Re-sterilize and put away any unused supplies for the purpose of reuse
- Dispose of soiled linen after each surgical procedure
