STATEMENT OF PURPOSE

I am writing to express my strong interest in the role of **Consultant Interventional Pulmonologist** in the Department of Pulmonary Medicine in your reputed Hospital.

During my tenure of MBBS & MD, I got the privilege of working in various healthcare settings, including the prestigious Mysore Medical College and Research Institute, where I was exposed to a diverse range of pulmonary conditions and treatments. These experiences allowed me to develop not only clinical skills but also the ability to communicate effectively with patients.

Following the completion of my MD in Pulmonary Medicine, I was fortunate enough to do my Senior Residency in the same institute, which was also a DRTB nodal centre. The experience helped me hone my diagnostic and treatment skills in managing MDR, XDR TB patients and helped me gain valuable experience in managing ICU/COVID patients, which further boosted my confidence in treating patients independently.

My passion for Interventional Pulmonology led me to pursue Fellowship program in Advanced Interventional Pulmonology under Dr Tinku Joseph at Amrita Institute of Medical Sciences where I was trained in advanced interventional procedures.

I am confident that my experience in pulmonary medicine, dedication, and commitment to excellence align well with the values and goals of your organisation.
