Dear sir/madam,

As an ambitious professional with communication proficiency and extensive Intern experience, I was thrilled to learn about the Pharmacist-in-Charge opening. I was compelled to contact you with my interest as it would be a career highlight to be considered for such an opportunity with this hospital. I believe that my professional background and industrialist drive make me an ideal candidate to fill this position.

I thrive in high-pressure and fast-paced situations, striving for positive results by applying my preparing medications and solutions and maintaining records abilities. Further, I possess expertise in ordering supplies and acumen for maximizing performance and inspiring colleagues. I am able to visualize success and identify unconventional yet highly effective strategies for achieving it.

I have skillfully balanced organizational objectives and productive relationships, strategizing and recommending ways in which to achieve and maintain a competitive business edge. My customer service and decision-making talents have supported my professional growth.

Enclosed, please find my resume for your review. I will look forward to contacting you within the week so we can discuss the next step in your hiring process. In closing, thank you for your time and consideration of my candidacy.

Sincerely,

Devika Sathyan

Devika Sathyan

Pharmacist

Work Experience

Intern 2022 - 2023

St John's Hospital

Located and measured medications according to prescription information, making modifications as instructed by pharmacists and providers.

Educated patients on possible drug interactions, potential side effects, and optimal methods of administration.

Provided friendly customer service at drop-off and pick-up counters.

Prepared packaging and labels for prescriptions, verifying accuracy of dosage, side effects, interactions, and refill instructions

Project 2023 - present

Face serum I St John's Hospital

The present study was an attempt to formulate, optimize and evaluate Caffeine Serum-gel. The formulation showed acceptable physical properties which makes it compatible with the skin.

Project 2023 - present

Transdermal drug delivery system

Transdermal Drug Delivery is defined as a self- contained discrete dosage form, which when applied to the intact skin, will deliver the drug at a controlled rate to the systemic circulation. Innovations in the area of drug delivery are taking place at much a faster pace as compared with the last two decades. Improved patient compliance and effectiveness are inextricable aspects of new drug delivery systems.
