## ➤ PROJECTS

- **Herbal Bath Soap**

Herbal bath soap was prepared using the cold process and melt-and-pour methods. The soap was evaluated based on physical parameters such as pH, stability, foam height, foam retention, percentage of free alkali, and alcohol-insoluble matter.

- **Antibacterial activity in edible fruit rinds**

The research investigated antibacterial properties in edible fruit rinds. Extracted compounds exhibited encouraging efficacy against bacteria, suggesting potential for future antimicrobial applications.
