Experience

Medical Surgical Nursing

Govt. Medical College, Idukki & Kottayam

- Provided basic life support for patients in emergency situations
- Conducted patient assessments, including vital sign monitoring, medication administration, and wound care.
- Applied critical thinking skills in various clinical scenarios ensuring prompt and effective responses to emergent situations.

Child Health Nursing

Institute of Child Health, Kottayam

- Provide routine patient care to children admitted for overnight stays
- Provide emotional support to young patients before and after exams and procedures
- Learned to administer procedures including running lines, suturing and blood drawing on infant patients

Mental Health Nursing

S. H Hospital Paynkulam

- Conducted thorough psychiatric assessments, including risk assessments and mental status examinations, to formulate individualized care plans
- Administered psychotropic medications as prescribed, closely monitoring their effects and collaborating with the healthcare team to adjust treatment plans as needed.
- Facilitated and participated in therapeutic group sessions, fostering a supportive environment for patients to share experiences and develop coping strategies.

Obstetric and Gynecology

Taluk Hospital, Nedumkandam & Adimali

- Played an integral role in providing antenatal care to expectant mothers, conducting regular check-ups, monitoring fetal development, and offering educational support.
- Assisted in labor and delivery procedures, collaborating closely with midwives and medical staff to ensure a safe and supportive birthing environment.
- Contributed to postpartum care by offering guidance on newborn care, lactation support, and monitoring maternal recovery.
