PROFILE SUMMARY

A comprehensive quality control process for pharmaceuticals involves several key tests and procedures. These include sterility testing, bacterial endotoxin testing, microbial limit testing, environmental monitoring, and bioburden testing. Additionally, biochemical tests are conducted to assess chemical composition and purity. Tasks such as media preparation, autoclaving, aseptic sampling, sterilization, and disinfection are crucial for maintaining cleanliness and safety. Following these procedures, sample analysis is conducted to ensure product quality meets regulatory standards. Throughout this process, computer documentation is essential for accurate record-keeping and compliance documentation.

EDUCATION

Master Of Science (2023)
General Microbiology
Marthoma College, Tiruvalla

Bachelor Of Science (2020)
Zoology & Industrial Microbiology
with Double Main Computer
VNS College Of Arts & Science, Konni

HSS
Biology Science
Sree Buddha Central School, Alappuzha

SSLC
St. Joseph Convent English Medium
School, Parayankulam, Alappuzha

EXPERTISE

Sterility Test
Bacterial Endotoxin Test
Microbial Limit Test
Environmental Monitoring
Bioburden Test
Biochemical Tests
Media Preparation & Autoclaving
Aseptic Sampling
Sterilization & Disinfection
Computer Documentation

WORK EXPERIENCE

04 Jan 2023 – 03 Jan 2024
Kerala State Drugs & Pharmaceuticals Ltd.
Trainee Microbiologist

CERTIFICATIONS

HACCP Level III
Highfield Level 3 Award in HACCP for Food Manufacturing
(RQF)

On Job Training - 2020
National Institute of Fisheries Post Harvest Technology and Training,
Kochi, Kerala

On Job Training - 2019
Varuna Aqua Products Pvt. Ltd.
